

2020 round of TSE EURL EQAs: Results feed-back

Discriminatory Western Blot in Small Ruminants EQA (DS20)

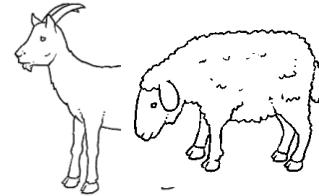

Laura Pirisinu

TSE EURL

Istituto Zooprofilattico Sperimentale del Piemonte, Liguria e Valle d'Aosta – Turin
Istituto Superiore di Sanità - Rome

Proficiency testing for Discriminatory Western Blot in Small Ruminants (PTDS20)

- All NRLs received an email (4th December 2020) informing the imminent dispatch of samples for the 7th December 2020
- Forms for returning the results were attached (and also supplied in the box in paper format)
 1. Cover Letter
 2. Electronic form for submitting the results

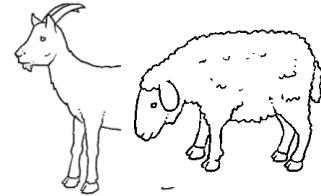

TSE EURL

Istituto Zooprofilattico Sperimentale del Piemonte, Liguria e Valle d'Aosta – Turin
Istituto Superiore di Sanità - Rome

Proficiency testing for Discriminatory Western Blot in Small Ruminants (PTDS20)

1. Cover Letter explaining:

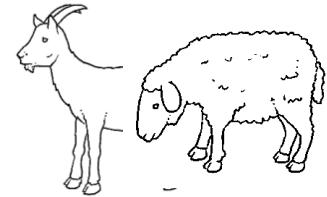

- a) How the samples were prepared:
 - » by homogenisation of brain tissue using a 50/50 mix of tissue and distilled water. Aliquots tested by Discriminatory WB
- b) Technical information for preparing the sample test
 - » storage temperature (-70°C)
 - » treatment of samples as tissue (not considering the water content)
 - » How to work the samples (shake/vortex, collect the tissue,...)
- c) Safety information:
 - » “MATERIAL IS FOR “IN VITRO” USE ONLY AND MUST BE TREATED AS HAZARD GROUP 3** SUBMISSION AND BE HANDLED ACCORDINGLY IN A DEROGATED CONTAINMENT LEVEL 3 LABORATORY”.

TSE EURL

Istituto Zooprofilattico Sperimentale del Piemonte, Liguria e Valle d'Aosta – Turin
Istituto Superiore di Sanità - Rome

Proficiency testing for Discriminatory Western Blot in Small Ruminants (PTDS20)

1. Cover Letter explaining:

d) How submit the results

- » The link to upload the results (<https://forms.gle/NA5RbLdsx8znSbin6>)
- » The excel file Submission PT DS20.xlsx
- » Raw data (blot images)
- » The format (*.zip, *.rar)

e) Deadline

- » 5th February 2021

f) Contacts

- » Gabriele Vaccari
- e-mail: gabriele.vaccari@iss.it
- telephone number: +39 339 6846007

2. Submission file (excel format):

- Identification of the PT scheme
- Laboratory ID

The “Laboratory identification number” is the identification code of each lab, received via email in 2019.

→ Note that a different code has been assigned to each different EQA
(the same laboratory may have more ID numbers!)

Proficiency testing for Discriminatory Western Blot in Small Ruminants (PTDS20)

- All Laboratories returned the results in the due time
- All Laboratories reported the correct results

however, EURL contacted 4 laboratories for further information:

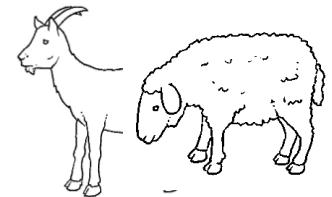

- The excel file compiled with some unexpected modification of the name of the method used (**2 labs**)
- The declared method did not correspond to the reagents and raw data (**1 lab**)
- The declared method did not correspond to the reagents and raw data were incomplete (**1 lab**)

TSE EURL

Istituto Zooprofilattico Sperimentale del Piemonte, Liguria e Valle d'Aosta – Turin
Istituto Superiore di Sanità - Rome

Proficiency testing for Discriminatory Western Blot in Small Ruminants (PTDS20)

Action undertaken:

- 3 laboratories were asked to provide clear information on the method/s used.
→ The info provided were satisfactory
- 1 laboratory was asked to provide detailed information (date of testing, antibodies, the correct definition of method used) and provide the complete raw data (images of the blots for each antibody used)
→ The info provided were satisfactory

Discriminatory Western Blot in Small Ruminants: changes in the protocol

A test developer may wish to vary the protocol of its approved method
(words, reagents, times/temperatures, automated systems...)

→ It is necessary to refer to EURL before implementation of any changes

The previous EURL provided the procedure for change the TSE Discriminatory Tests

The revised guidelines will be soon available

[Change Management Procedure for TSE Discriminatory Tests \(listed in the European Reference Laboratory \(EURL\) Discriminatory Testing Handbook\)](#)

1. Introduction

Discriminatory tests are used for testing confirmed scrapie positive samples within EU countries (Based on Regulations (EC) No 253/2006 and (EC) No 1053/2003 amending Regulation (EC) No 999/2001).

The methods are approved for use within the EU and are included in the EURL Discriminatory Testing Handbook available on the TSE and EURL website <http://www.tse-lab-net.eu/documents/tse-oie-rl-handbook.pdf>

The approval of a given method is linked to the testing protocol that was used to generate the validation data. In the case of discriminatory tests, this was the successful completion of a ring trial organised by the Strain Typing Expert Group (STEG) of the TSE EURL. If the test developer wished to vary this protocol in any way, approval must be obtained in writing from the TSE European Reference Laboratory (EURL), before implementation of any changes.

This document aims to provide guidelines within which EURL approval may be given. The purpose of this document is to explain what types of changes may be made, how these changes may be made and to outline the types of supporting data required for approval of such changes prior to their incorporation into the Handbook. This document is aimed primarily at the developers of TSE Discriminatory tests, but is also available to NRLs and testing labs so that they know what is required of test developers.

2. Guidance

The EURL should be advised of ALL types of proposed changes to the protocol including:

- Changes of wording
- Changes to the reagents used in the test
- Changes to buffers
- Amendments to how reagents are stored or prepared
- Changes to shelf life
- Changes to how the test is carried out including different incubation times or temperatures
- Use of automated systems
- Changes to interpretation of results or use of controls

Change management procedure for TSE discriminatory tests
