## History of TSE measures

Feedban, a key TSE measure

#### Main TSE legislation prior to Regulation (EC) 999/2001

| Year | Legislation                                                              |
|------|--------------------------------------------------------------------------|
| 1988 | Initial feed ban introduced in the UK                                    |
| 1989 | EU legislation banning the export of certain types of cattle from the UK |
| 1990 | BSE made a notifiable disease in the EU                                  |
|      | Modifications to the ban on the export of cattle from the UK             |
| 1994 | EU feedban (mammalian protein to ruminants)                              |
| 1996 | Total prohibition on animal and animal products from the UK to the EU.   |
|      | Method 1 rendering required for high-risk material in EU                 |
| 1997 | EU SRM controls                                                          |

#### **Cycle of infection for BSE**

### **The 2 main TSE prevention measures**

Feed ban is the main measure in place for the protection of animal health

**SRM** controls are the main measure in place for the protection of **public health** 

## Feed ban

The **feed ban** is the main TSE preventive measure for the protection of animal health

Legal base: Regulation 999/2001 Article 7 & annex IV

Two things to regulate:

- What feed material is banned for which species?
- Prevention of cross contamination

## For both goals, the analytic possibilities lead the way

## Recent amendments of Regulation (EC) N°999/2001 with respect to feed ban

#### Commission Regulation (EU) No 56/2013

- PAP from non-ruminant animals and feedingstuffs containing such PAP were reauthorised for feeding aquaculture. **"The test case" -> need for the ruminant test -> ruminant PCR** 

#### Commission Regulation (EU) No 2016/27

- Under certain conditions allows export of non-ruminant PAP without prior agreement with Third countries. **"End of extra-terrestrial requirements"** 

#### Commission Regulation (EU) No 2017/893

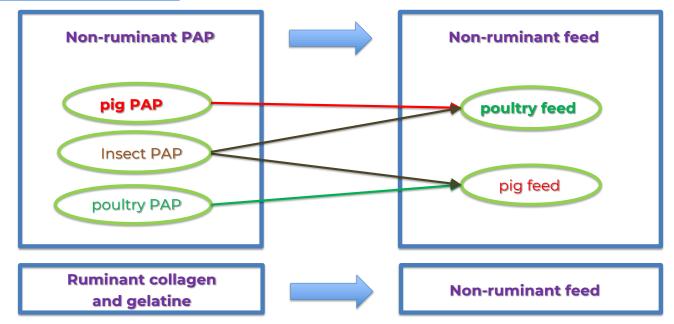

- Authorises the feeding of farmed insect PAP to aquaculture animals. Need for an insect test -> insect microscopy
- Defines rules for export of ruminant PAPs and allows export of petfood containing ruminant PAP

#### Commission Regulation (EU) No 2019/1091

- Authorises export of organic fertilisers or soil improvers containing ruminant PAP

## **FEED BAN - Most recent changes**

COMMISSION REGULATION (EU) 2021/1372 OF 17 AUGUST 2021; **After + 10 years the analytical methods (PCR pig & PCR Poultry) allow the steps foreseen in 2010** (see <u>https://data.consilium.europa.eu/doc/document/ST-13889-</u> 2010-ADD-1-REV-1/en/pdf)

| Farmed animals other than fur animals               |                                                    |                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Pet and fur                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

#### Summary of feed ban rules laid down in the TSE regulation 999/2001 annex IV (applicable as from 7 September 2021)

\*fishing bait is considered to fall under the category of feed for aquaculture, since one cannot guarantee that the fishing bait is only used for wild aquatic animals and not for kept aquatic animals

## **Prevention of cross-contamination**

- Cross-contamination can occur at any point along the production chain
- Rules to prevent cross-contamination set out in Annex IV of Regulation 999/2001

## Some advice for future changes

After working 20 years with the feedban (and ABP) regulations

.be

Federal Agency for the Safety of the Food Chain

#### Some ideas for future legislative work

#### "BSE was 20 years ago"

- · Back to the core
- Keep what works/is needed, leave what doesn't
- Controllability and simpler rules are key to keep the public, political and administrative "goodwill"

#### New "building plan" needed

- No more product-by-product rules
- "Incompatibilities" logic
   approach/basic bans
- Keep developing analyses that help detecting authorized and nonauthorized products (e.g. milk, eggs)
- Cleaning regimes?

#### Incompatibilities

# The TSE story

#### Success story

- 1 comprehensive legislation (together with ABP rules) succeeded in reducing the prevalence the TSE drastically
- Was no easy task dealing with an "unknown", revolutionary and scary causing agent.
- General plan of first complete ban and relaxation when needed and possible worked brilliantly

#### Next steps

- Training and implementation
- Constant advocacy to maintain TSE and feedban rules
- But lean and logic
